## Memorial Service.

The annual memorial service for those who, going from the Didsbury district, died during the Great War, was held at the Butte on Sunday under the auspices of the Didsbury Legion. Despite the heat there was a large attendance.

At 2.45 p.m. the returned men of the district, accompanied by a number of visitors, fell in at the I.O.O.F. Hall under command of Lt.-Col. Shields, M.C. and led by the C.A.S.C. band from Calgary, marched to the Butte.

During the service wreaths were placed at the foot of the monument by Capt. Lowrie for the Legion, Mrs. Kendrick for the I.O.O.F., and flowers by a number of friends. The Last Post and Reveille were then sounded.

The band played numerous selections, which were greatly appreciated. The service was conducted by Rev. A. J. Mitchell, Chaplain to the Legion.

## Bride-To-Be Honored.

Miss Lydia Knudsga, who is to be married at the end of August, was honored with a shower by her friends at the home of Mrs. J. H. Fleury last Thursday afternoon and evening.

Tra was served in the afternoon on the lawn, which was decorated for the occasion with pink and white streamers.

In the evening six tables of bridge were played, at which Miss Dorothy Chrysal, of Carstairs and Miss Lucile Smith took the honors.

Miss Knudsga was the recipient of many beautiful and useful gifts, and her many friends of Didsbury and district extended many good wishes for the future.

PUNCHES, WHIPS and PLIERS

## Dairymen Organize.

A meeting of cream shippers of the district was held on Saturday evening and it was decided to organize a Didsbury Dairymen's Association.

With the organizing of an association the dairymen will have a better opportunity of keeping in touch with the marketing conditions of table cream in the city.

A committee was appointed to take up the matter of cream shippers' permits with Dr. Hill, the Calgary Medical Health Officer, as present permits expire September 1st.

According to a petition which was recently signed, to be presented to the Dairy Commission, there are 83 dairymen in the district who wish to market table cream for use in the City of Calgary.

## Commends Dairy Herd.

Mr. Hunter, who has charge of the advanced registration for Canada of Jerseys, Guernseys and Ayrshires, recently visited the herd of Mr. N. S. Clarke and gave advanced registration of A.A. on the imported bull, "Brampton Hal's Sultan, No. 64957," which heads the Clarke herd.

Mr. Hunter was much pleased with the excellent standing of this herd of Jersey cattle and said that it would be of much benefit to both the district and province if there were more herds of this class established.

Mr. Reid Clarke has been awarded a silver medal by the Canadian Jersey Cattle Club for the outstanding production of a heifer raised by him. This heifer, "Didsbury Sid's Viola, No. 56524," came fresh at the age of 1 year and 344 days and made a production record of 411-lbs. of butterfat in 305 days.

Jackie Cooper and Chic Sale in "When a Feller Needs a Friend."

at the Opera House on Friday and Saturday, August 18 and 19. Added attraction, Schmelling Baer fight picture. Regular prices.

## LOCAL & GENERAL

Mr. Austin returned last weekend from a holiday at Sylvan Lake.

Rev. D. McGregor and family are visiting with Mr. J. M. Allen, west of town.

Mr. Jack Currie is the relieving manager at the Three Hills branch of Jenkins' Groceries.

Mrs. Radcliffe and children, of Edmonton, are visiting her sister, Mrs. W. H. Chamberlain.

Miss Ruby Kercher, who underwent an operation for appendicitis at the Didsbury Hospital, was able to return to her home on Tuesday.

Mr. and Mrs. W. J. Hillyard returned Saturday last from Wainwright, where they spent a week's vacation.

Miss Elva McMan returned to her duties at the telephone office last weekend after a vacation spent at Sylvan Lake.

Mr. and Mrs. C. H. Adshead and family left Monday for Wyndell, B.C. where they will visit with Mrs. Adshead's parents, Mr. and Mrs. G. Lunt.

Mrs. R. D. Cole, who has been visiting her son, Mr. Noble Cole and family for the past two months, returned to her home at Salmon Arm, B.C. on Monday.

Dr. Clarke underwent a major operation at the University Hospital, Edmonton on Saturday morning. We are pleased to hear that from last reports he is doing as well as can be expected.

We are pleased to see Mr. A. R. Kendrick around again after his recent illness. He returned about ten days ago from the Holy Cross Hospital at Calgary and says he is feeling fine.

Mr. and Mrs. R. C. Oldham and Mr. and Mrs. W. J. Scheidt and family returned Friday from a three weeks' holiday in Oregon and Washington. They report the western Oregon and Washington crops as looking really good.

Mr. Cliff Bellamy and son Raymond, accompanied by Mr. Walter Bellamy and Mr. and Mrs. C. E. Marcellus, returned home Thursday last from Salmon Arm, B.C., where they visited Mr. John Bellamy, father of Cliff and Walter, who has been very ill, but is now progressing nicely towards recovery.

## Grain Shipments Beat All Records

With the close of the grain shipping season, statistics show that the grain shipments for 1932-33 have broken all records in the history of the district.

During the year over a million and a half bushels of grain have been marketed at Didsbury. Wheat marketing comprised a million and a quarter of this total.

The previous record was in 1923, when 1,250,000 bushels of grain were shipped, half of which was coarse grain.

The new record was established in spite of the fact that the railroads built east and west of here reduced the territory for grain shipment almost 25 per cent.

## High School Opens Monday, September 4

Didsbury High School will open for the new term on Monday, Sept. 4th.

All pupils who intend taking up subjects at the High School must register on the first day, whether they intend attending school then or later.

## LOCAL & GENERAL

Mrs. Bert Fisher and children, who spent a two weeks' visit with Dr. and Mrs. Taylor at Okotoks, returned home last weekend.

Mr. and Mrs. J. H. Hehn and Mr. Willard Hehn, of Newburg, Oregon, are visiting with their daughter and sister, Mrs. Ward Keith.

Mr. and Mrs. A. Bussio are spending their vacation motoring in the Rocky Mountain National Park.

Miss L. Knudsga, who has been visiting with Mrs. J. H. Fleury for the past two weeks, left for her home at Camrose on Saturday.

Mrs. W. Dawn and Mr. Otto Mueller, of Ghost Pine, visited over the weekend with their sister, Mrs. Bert Fisher.

Bill Stark was successful in winning the Ferris Cup and also the junior championship at the tennis tournament at Calgary last week.

Mrs. W. O. Highland and Earl, Mrs. W. A. Waycott and John, all of Calgary, are visiting this week with Mr. and Mrs. Erven Rodney.

## 'Peg' Winnipeg Wheat Prices

Members of the Winnipeg Grain Exchange in emergency session on Monday unanimously decided to establish minimum prices for grain futures and thereby peg the prices of wheat and coarse grains.

The exchange set closing prices of Monday, Aug. 14th as the minimum at which futures prices would be pegged "until further notice."

The action of the members was taken due to "abnormal conditions surrounding other markets," it was stated.

The following resolution was unanimously passed: "Resolved, that in view of the abnormal conditions surrounding other grain markets, and the effect that these conditions might have on this market, to the detriment of the producer, the closing (clearing) prices on Monday, August 14th, 1938, for contracts for all grains for future delivery be and are hereby established as minimum prices."

"Until further notice, no trades in grains for future delivery shall be made below these minimum prices."

October future wheat closed on Monday at 70 1/8, December ended at 71 5/8, and May at 75 3/8.

## Life Means Change.

Occasionally the writer of this column feels the urge to pass on to the readers of it some thought, or idea, or even complete article he has come across in his own reading. In surrendering to that urge this week, we pass on an article appearing in a little United States magazine which does not go into general circulation, which has no subscription list, but which is distributed free to a selected list of people in all parts of the world. That article follows:

To prepare us for life in a world that is continually changing, that is a very small part of a universe in which nothing is or ever will be static even for the space of one brief second, humanity has been taught, from the earliest dawn of reason, to strive for permanence, security, safety, ease, something which we may accept as settled. Thus we find ourselves mentally and spiritually unprepared to meet the apparently sudden, unexpected changes which follow inevitably upon some wide-spread emergency. Instead of schooling ourselves to meet emergencies in their varied and unpredictable phases, we have preferred to be lulled or to lull ourselves into a sense of false security, to surround ourselves with an atmosphere of spiritual anesthesia. Instead of taking life as a tremendous adventure—and it is this or nothing—we delude ourselves into the belief that we have made of it something restfully secure, that we have created, in some measure at least, a lasting order of things. And we commit the added absurdity of telling our children that these things are so, when our whole experience, the experience of all humanity proclaims them to be utterly false.

How different would have been our reactions to the experiences of the last three unconquered trying years had we been free from the traditional fear of change. And why should we fear change when it is the most certain thing that life brings us? It is the very essence of life; the vital germ of growth; the stimulus toward achievement; the point of far-funged outlook along the road of progress. Change gives life its vitality; lends it sparkle and variety and the lure of glorious adventure; makes it worth living to those who have learned the most precious, most helpful of its secrets. Acceptance of this fact is the one royal way to spiritual freedom, and in spiritual freedom lies the only assurance of safety, of permanence, of safety, of ease to be found in all the range of created things. For only when the spirit is free—from delusions and superstitions and intolerances and fears and traditions and narrow prejudices and selfishness—free to venture where it will and when it will, is it prepared to meet, with profit to itself, the ever unexpected possibilities and adventures of life. The accumulation of these spiritual profits is the one sure laying-up of treasure where neither moth nor rust can corrupt, and where thieves cannot break through and steal. It is the one treasure not subject, except in enhancement, to the vicissitudes of life.

The chief thing in living is life itself. The chief purpose in life should be to live it abundantly, joyously, zealously; to savor each of its constantly varying phases; to get all we can out of it and to put all we can into it. We should not fear to meet any part of it. We should prepare ourselves for the realities of life, frankly admit them as realities, and reap the fullest possible advantages from them. And if we do this we shall come to the inescapable conclusion that the genuinely desirable advantages of life have little if anything to do with material things.

If we would enjoy life to the full, we must change our traditional attitude toward it. Instead of building upon the illusion of permanence, we must build upon the certainty of change; constant change both within ourselves and in all other created things, physical, mental and spiritual change. For without change life could not exist. To imagine any possible permanence in life, anything static, anything unchanging even for the smallest period of our conception of time would be to imagine our most fearful and hopeless conception of death. And life knows no death, only change, and continuing life.

There is no thought in anything I have said here that we should not strive intelligently and courageously for some measure of stability, some temporary standard of thought and action, in our material affairs; but in our thinking, our planning and our striving we never should for a moment lose sight of the realities of life, and that neither permanency nor absolute security is one of them. Our ideas of security, of any settled order of things, should be relative. They should be held loosely and subject to the certainty of change. In other words, we should prepare ourselves for change as for the one sure thing which life offers us. Our accumulations of things material should be secondary to our accumulations of things spiritual. The insecurity of material accumulations should make us value more highly the security of spiritual accumulations, our experiences, our memories, our generous and friendly impulses, our unselfish and tolerant motives, our whole attitude toward our fellows, our confidence in the eternal beneficence of life, our love of what is good, our desire for continuing human betterment, in short, all that our experience has taught us is most to be desired.

Let us then accept life frankly as a glorious adventure, and face it at all times cheerfully and bravely. Let us banish fear, fear of present insecurity, fear to venture because of uncertainty, above all else, fear of change. Let us be constantly prepared for change, ready to take advantage of it rather than to have it take advantage of us. Let us live our lives to the full and go forward cheerfully, bravely, confidently, and with light and hopeful hearts.

Germany has a "renovative" campaign. Drouth is threatening crops in parts of Honduras.

## Summer Complaint Plays Havoc With the Bowels

Few people escape an attack of summer complaint. It may be slight or it may be severe, but both the young and the old are liable to it during the summer months.

You cannot tell when it seizes you how it is going to end. Let it run for a day or two and see how weak and prostrate it will leave you.

On the first sign of an attack of any looseness of the bowels take a few doses of Dr. Fowler's Extract of Wild Strawberry and you will see how quickly it will get rid of it.

Manufactured only by The T. Millburn Co., Limited, Toronto, Ont.

## Botanists Are Interested

### Awailing News Regarding Discovery Of Musk Plant In B.C.

Botanists everywhere are awaiting eagerly news concerning the musk plants with the long lost odor on Texada Island, B.C.

In connection with the reported discovery by Stanley Boys on Texada Island, on the British Columbia coast, of a musk plant carrying the distinctive odor common over twenty years ago but since unknown, Dr. Arthur W. Hill, director of the Royal Botanic Gardens, Kew, England, is keenly interested.

Dr. Hill has written to Frank Kermond, of the Provincial museum of natural history, Victoria, saying the discovery, if it can be substantiated, is of every great scientific interest. He asks that if possible seed or plants with a strong musk scent may be forwarded to him at Kew, and gives instructions for their safe packing for the journey and outlines special precautions to be taken in forwarding them.

The musk of the odor well remembered by most persons of English upbringing, it was believed, is a not plant for houses in England a quarter of a century ago—is said to have been taken to England originally from British Columbia by the famous Douglas whose name is perpetuated in our Douglas fir.

It is given as having originated on the American continent by authorities. It had commercial value for perfume manufacture years ago and there are commercial possibilities about its rediscovery in British Columbia apart from world-wide scientific interest.

## Located Lost Galleons

### Pirate Loot Within Grasp Of An English Adventurer

Treasure buried long ago by pirates who had stolen it in raids on merchantmen is believed to be within the grasp of an expedition led by Stratford D. Jolly, an English adventurer, who, with his party, set out from Brinkham more than a year ago in a converted steam trawler. At least, Jolly believes the treasure is within his grasp. He is expected to return to England for a short time, but will continue the search in another vessel the trawler having been sold.

One of their party, Frank Cooper, who gave up a post in the glove-manufacturing industry at Tescott to join the expedition, told gold diver, was able to locate at Trinidad a number of sunken Spanish galleons, which were scuttled in 1797 to avoid capture by the British Fleet, according to Jolly's story.

Finding the galleons, he said, was as easy as could be for Cooper, who used for the purpose only a gramophone spring. "That Cooper's work was successful we know," said Mr. Jolly, "because we took soundings and were able to trace the actual position of the sunken ships. They are down in only seven fathoms of water—a depth easy for divers to work in—and, above all, they are in a very sheltered part."

## Prairie Wheat Sales Higher

### Show Substantial Increase Over Corresponding Period In 1932

Prairie wheat marketings showed an increase of 2,551,379 bushels over the corresponding period last year for the week ending June 23, according to Dominion Government figures released this morning.

Total marketings for the crop year to date were 356,742,219 bushels as compared with 258,022,190 a year ago. For Saskatchewan the year's sales were 180,185,507 as compared with 115,803,829.

## Russia's New Fast Train

With a new idea for locomotives, S. S. Vaidner, an official scientist of the Russian transport commissariat, has invented an exceedingly fast railway engine which is called an "aero-train." The prefix "aero" is a trifle misleading, because the locomotive does not fly, but the term is intended to describe the engine as of the aeroplane type, with propellers. It is stated that the train is stable at a speed of more than 150 miles an hour.

The production of potatoes in Canada in 1932 amounted to 39,416,000 cwt., the smallest yield recorded since 1918.

## Ceylon's First Woman Lawyer

### Nineteen Year Old Girl Was Brilliant Scholar In London

Among those to pass the examination for call to the English Bar is Miss Avaridia Mehta, of Colombo, Ceylon.

Miss Mehta is only 19 years old, a slim Parsi girl from Ceylon, whose appearance would give the impression that her school days were hardly over yet. She was a brilliant scholar at the Maria Grey Training College, London, England, and after she matriculated she read for the Bar in Lincoln's Inn.

I saw her all her home in Hampstead, where she is living with her mother—writes an Evening News representative. She was wearing a native dress of blue and gold.

"I shall be the first woman barrister in Ceylon," she said. "There are, of course, a number of women lawyers in India, but up to now there have been none in my own country."

"I am eager to begin work at the Bar in Ceylon, but I have to wait some time yet before I can do that. I cannot be called until I am 21, and I have to eat my dinner for three more terms. I may go to India first and practice there for a time before going to Colombo."

Miss Mehta said there was no branch of the law in which she took special interest, and she had practice would be a general one. Her father is a marine superintendent at Colombo, and one of the few Parsis in Ceylon. "There are only 200 there," she said, "but there are 100,000 in India."

## Wanted To Look Around

### Prince George Climbed 180-Foot Scaffolding Beside "Big Ben"

Prince George demonstrated remarkable nerve before a small crowd of people when he climbed up the web-like scaffolding surrounding Big Ben's tower at the House of Commons. No one looking up knew who the "human fly" was. To them it was simply a young man in a gray suit.

The prince had expressed a desire to climb up the ladders from platform to platform until he reached Big Ben, and then have "a good look round." Accompanied by two of the men engaged on the scaffolding work, he reached the highest point. After a few minutes he climbed over a parapet leading to the gallery where the bells that chime the quarters are installed. The prince ascended by means of a long spiral staircase inside the tower.

"Climbing the ladders to such a height is not an easy job for one not accustomed to the work," an official told a reporter. "But the prince got up very easily, and showed no nerves. He told us that he thoroughly enjoyed the experience." During the 180 feet ascent the prince had to climb up steep ladders from which, when glancing down, he could see nothing between himself and the ground. In many places the scaffolding upon which he had to walk consisted only of a couple of planks.

## Matter Being Considered

### Train Ferry May Be Inaugurated Between England and Sweden

A train ferry between Sweden and Britain may be inaugurated, if present plans materialize. A minimum capital of one-half million kronor already has been subscribed, due to the confidence with which the project is regarded in Britain.

Drawings for the ferry have been made and the boat is estimated to cost 2,500,000 kronor and have room for 54 refrigerator cars, 10 freight cars and 429 first-class passengers. The Swedish terminal will be Varberg.

It has been suggested that during the summer months the ferry make an intermediate stop at Copenhagen.

## Some Birthday Dinner

Peter the Great, three tons of hippopotamus is 30 years old and Bronx zoo officials prepared his four-course birthday dinner. The appetizer was a baked basket of mangels. In lieu of soup was served a shaft of young corn stalks. Entrees consisted of two halves of brown rabbit bread. And the piece de resistance was Peter's standard dinner, 100 pounds of hay.

## More Aeroplane Passengers

### Business Increasing On U.S. Lines and Competition Is Keen

The skyways of North America are being "double tracked."

A survey of major air lines carrying passengers to every corner of America—and one of them planning to extend across the ocean—showed that commercial aviation has increased its passenger income by one-third in recent weeks.

The reason, however, activity in general business and loss of what aviation men call "air anxiety" by the public.

The result: A battle for the new business comparable to that of the railroads several decades ago.

In the scramble for passengers, millions of dollars have been poured into new equipment. Soundproof cabins have been evolved by United Air Lines. American Airways has responded with ships in which passengers can sleep on comfortable berths during night trips between Chicago and the Pacific Coast.

A smaller line, Northwest Airways, has ordered a fleet of "planes capable of 215 miles an hour with a cruising speed of 180 and announced a plan to compete for business between Chicago and the Pacific northwest.

At the coast, Northwest will connect with Pan American Airways, which plan to extend its present lines to Alaska across the Arctic to Asia. At present, Northwest operates between Chicago and Montana and northward to Winnipeg, Man.

As proof of increasing business the Chicago municipal airport announced that 6,927 passengers were carried out of Chicago on regularly scheduled trips during June, an increase of 100 per cent over the same month last year. Many licensed pilots have obtained employment in the past few months, air line officials announced, because of additional planes placed on schedules.

Trips between Chicago and New York have been doubled by three lines. A traveller between the two cities now has a choice of more than 20 planes daily, the time of the schedules ranging upward from four and three-quarter hours eastbound to five and one half hours westbound.

## Home For Orphan Boy

### Adopted By Wealthy Couple Whose Dead Son He Resembles

The home of a wealthy silk dyer and such advantages as a college education were ready for a 15-year-old orphan boy from Omaha, Neb., in what seemed like a modern version of the old story of Cinderella and the prince.

The boy was Peter Christopolis, and inmate of Father Flanagan's Boys' Home near Omaha. A picture of the lad, an orphan since early childhood, was the medium through which he has become just like a son in the home of Mr. and Mrs. Jean Strenghs, who live at Paterson, New Jersey.

It seems that Strenghs saw the picture of Peter and was struck by the resemblance of his son, Henry, who was drowned in Green Pond, N.J., a little over a year ago. As a result, arrangements were made to bring Peter to the Strenghs household to take the place of the dead boy.

## Hardly Necessary

With the nations feeling the way they do about each other, what need is there for laws that go 110 miles an hour and airplanes that go 250 miles an hour? It must be that we are perfecting communications in order to get away from each other as fast as we can.

A fence twenty miles long without a bend or turn has been completed in Kingsville, Tex., on the bounds of a ranch.

W. N. U. 204

## Gigantic Battle Against Bovine Tuberculosis Being Waged By The Department Of Agriculture

Over 1,000,000 tuberculin tests were conducted on cattle in Canada during the past year, it was stated by Dr. G. H. Hutton, veterinary director-general of the department of agriculture. Almost 1,000,000 cattle will be retested this year and between 10,000 and 15,000 new herds added. With Canada's cattle population approximately 8,000,000 and her milk cow population slightly over the third of the total, the battle to free Canadian herds from tuberculosis is a gigantic one.

The department is discontinuing altogether this year compensating farmers whose cattle react to the test if they are under the municipal tubercular order. However, under the other policies the compensation will be paid as heretofore.

The object of the department is not primarily to protect the health of the public by this means but to free the herds from tuberculosis. The protection of the health of the people is a provincial and municipal matter. It is for the provincial and municipal authorities to see that milk and milk products, free from tubercular germs, are provided to the consumer for the protection of the public. These authorities are responsible that the pasteurization is effective and impure milk kept from the public.

The primary object of the agricultural department is to "reduce the economic losses in livestock because of tuberculosis."

When the fight against bovine tuberculosis first started in this country, it was in what were known as supervised herds. In this the government tested the herds but did not pay any compensation for the cattle that were weeded out. That is still in force and nearly 20,000 herds will be dealt with this summer.

Then came the municipal plan in 1914. Under it a municipality took steps to insure that all the milk sold within its borders was from tubercular-free herds. The government tested any herd from which milk was sold to the corporation making the application. Some 28 municipalities originally went into the scheme and the government tested the herds. The farmers were compensated for loss of the reactors.

For some time it has been felt that this was a very ineffective method of fighting the disease and very expensive. Accordingly some eight or nine years ago the department decided to carry on with the municipalities already in the scheme but to accept no more applications. Now, however, the entire scheme has been dropped in favor of the restricted area plan, the accredited herd plan and the supervised herds.

One of the arguments against the municipal plan was that only herds supplying a certain municipality would be tested. All around it were cattle in herds not so tested. The owner of the tested herd was continuously replacing milkers in his herd with milkers he bought elsewhere. The result was that the herds would not stay free of the disease and the number of animals which had to be slaughtered was great with a correspondingly heavy compensation bill for the government with very little progress.

Under the restricted area plan however entire areas are cleared of tubercular cows and county after county has gone in for this plan with its compensations.

The accredited herd plan, an international agreement whereby herds are purchased animals for sale are tested and compensation given for animals destroyed will remain in force.

### Daylight Saving In Finland

Finland is the latest state north of the Equator so far as summertime is concerned. The clocks did not go forward until June 20th. South of the Equator, of course, summertime doesn't start until September or October, and carries on through winter. In one country it's always daylight saving time. In Soviet Russia all clocks are one hour in advance permanently—summer and winter.

### LOTS OF GRACE ABOUT THIS JUMPER DRESS WITH TRAY SHOULDERS

An interesting feature is the soft becoming neckline. Its lines are slenderizing too.

Soft crepe silks, either plain or printed, are lovely for this model. Carried out as the original, you'll see plain crepe silk in beige for the dress with a brown and white print for the gumples.

Red and white crepe silk print jumper with plain white gumples is cute idea.

The dress can also be worn without the gumples. Its simple styling makes it very suitable for cotton fabrics and tub silks in white or pastel shades for your summer wardrobe.

Style No. 732 is designed in sizes 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40 and 42 inches bust. Size 36 requires 3 1/2 yards of 39-inch material for dress with 2 1/2 yards of 35-inch material for blouse.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

### To Enforce Act

Grading and Stamping Of Beef On Compulsory Basis In Saskatchewan. Saskatchewan is putting teeth into the Federal Livestock and Livestock Products Act, which provides for the grading and stamping of beef.

By a provincial order-in-council, passed on June 6, the regulations contained in the federal order-in-council which has been in effect for the past two years, have been made compulsory.

In other words the regulations which have been operating on a voluntary basis are now placed on a compulsory basis with the onus on enforcement upon the federal government.

Publication of the provincial order-in-council, together with the regulations as set out by federal enactment are controlled in the current issue of the Saskatchewan Gazette.

### A Resourceful Trader

Tom Harvey, veteran trader of Cumberland House, 100 miles west of The Pas, Man., has drafted a new record for unusual freighting rights on the Saskatchewan River. Mr. Harvey needed a dwelling near a store, and having one in The Pas, decided to move it into the hinterland. It was loaded on two axons and towed by gasoline tug.

### An Example To Europe

Norse Countries Have Preserved Peace For Over Century

For more than a century peace has reigned in the Scandinavian and Baltic countries. No war has ruffled the neighborliness of these nations for almost 125 years.

Sweden, Norway, Denmark and, further south, Holland, practiced the spirit of the Briand-Kellogg anti-war pact for more than a century before that document came into existence, a political writer on the daily Maastricht reminds his readers. There is no counterpart to this phenomenon in the rest of Europe, he says.

Two facts he regards as especially interesting are that this north-western peace atmosphere of Europe has not arisen from written treaties, but from an attitude of mind and that it has shown a tendency to spread the spread of European thunder storms to the north-west and will most likely continue to do so.

### Carries Radio-Phone Set

New Idea For Reporters Is Giving Entire Satisfaction

New Idea For Reporters Is Giving radio-telephone set has received its baptism of reportorial fire and acquitted itself admirably.

The set weighs 35 pounds and is carried on the back of a reporter. It has a sending range of about four miles. It uses less than two watts power and operates on ultra-high frequency waves.

The gadget set received its first real test under actual reportorial conditions when used by George Kirksey, sports writer, during the A. A. U. track and field championship at Chicago recently. Using the set Kirksey was able to flash to his telegraph wire located at the judges' stand the results of many events even before the A. A. U. timers could cover the distance from the finish lines to the judges' stand.

### Comfort For Spectators

Winter Sport Enthusiasts In Switzerland Enjoy Heated Grandstand

Grandstands for the accommodation of winter sport enthusiasts in Switzerland are now being heated electrically. In one such stand, insulated cables are placed in rows of three under the seats. Tin strips radiate a uniform heat, and only a short time is required to heat the entire stand in this manner. In order to avoid short circuits, every cable length is grounded through an automatic switch which immediately disconnects the endangered section.

The current is supplied by the same power plant which makes the artificial ice for the skating rink or other sport.

## Scientific Investigations Will Feature Work Of Government Expedition To Arctic Archipelago

### Western Forage Crops

Pasture Crops Occupy Only About Five Per Cent Of Cultivated Land

The amount of cultivated land devoted to forage crops in the three Prairie Provinces has been relatively unimportant as compared with the total area which has been seeded annually. No statistics which are available show that hay and pasture crops occupy in the neighborhood of five per cent, about half of which, or 1,000,000 acres, is improved pasture. These figures taken by themselves, however, says Dr. L. E. Kirk, Dominion Agrostologist, are misleading in that they do not include cereal crops which are pastured or harvested in the sheaf for hay. The latter in Western Canada is very important. Oats are grown more extensively for feed than all other forage crops combined. No estimates are available of the uncultivated pasture lands, which are very important also and are chiefly responsible for the limited acreage of improved pasture. About 7,000,000 acres of ranching country are leased for grazing purposes.

### All Metal Homes

New Process For Making Marble-Surfaced Steel

Preparing for an era of all-metal homes, the Mellon Institute announces a new marble-surfaced steel. The stone effect is imitation, made by a laminated resin surface woven inseparably with the metal. Any other finish made with the new laminated resins can be added. In this manner, it can be made to imitate wood.

Decorative finishes already are applied to steel by other methods, the announcement states, but says this is the first process to make the surfaces such an integral part of the metal. The adhesive is an alloy, such as tin or zinc, which fuses with both the steel and the covering.

### Constitutes a Record

Mackintosh of Mackintosh who is 82 years of age presided at the annual dinner of the London Inverness Association the other night for the fifty-second year in succession, a record. He is enjoying his visit to London immensely. The Mackintosh is a close friend of the King, and in proposing royal toasts he always makes a brief reference to the King, the Queen, the Prince of Wales, the Princess Royal, and other members of the royal family—an unusual custom—Glasgow Herald.

### VINE'S CONQUEROR IN ACTION

Here is an excellent action picture of Jack Crawford who performed the iron man feat in the final of the All England Men's Singles Lawn Tennis Championship by defeating Ellsworth Vines, United States titleholder. Crawford, who hails from Australia, has been in the front ranks of tennis stars for a number of years but this is the first time he has won the British title. The match between the Australian and United States champion went to five sets with Crawford showing much superiority in the final set.

The Department of the Interior's 1933 expedition to the eastern islands of the Canadian Arctic Archipelago sailed from Montreal on board the Hudson's Bay Company's steamship, "Nascopee" on the morning of July 8, beginning one of the most extensive patrols undertaken in many years. This year's visit to the northern posts will be extended to points in Hudson and James Bays and in addition to the regular inspection will also make a study of plant life, mineral occurrences, and parasites. It is expected that the voyage will cover about 12,000 miles and will be completed late in September or early in October.

Major D. L. McKend of the Dominion Lands Administration is again the Officer in Charge with Dr. W. C. Eburne, also of the Department of the Interior, as assistant. Mr. Philip Norton, Secretary and Historian; Dr. J. A. Eldred, Department of the Interior, Ship's Doctor during the northward patrol; Dr. M. O. Malte, Department of Mines, Botanist; Mr. W. E. K. Middleton, Department of Marine, Meteorologist; Dr. H. G. Gunning, Department of Mines, Geologist; Dr. Ivan W. Fairbairn, Macdonald College, Parasitologist; and Captain, T. F. Smellie, Ship's Master. Dr. Bilfield, the Ship's Doctor on the northward voyage, will disembark at Pangnirtung, Bathurst Island, to continue the voyage of Dr. L. D. Livingstone as medical officer on Bathurst Island. Dr. Bilfield will remain there for two years, Dr. Livingstone returning to Ottawa with the expedition.

Inspector T. V. Sandys-Wausch is in charge of the Royal Canadian Mounted Police party with the expedition which consists of the following: Corporals W. G. Kerr and H. Kearney, and Constables S. S. Spaulding and A. E. Fisher. Corporal Kearney will join the detachment at Craig Harbour, Ellesmere Island, while the others will relieve members of the force at other posts who have completed their tour of duty in the North.

Eighteen ports in all will be visited by the ship. During the voyage the supplies will be distributed to company trading centres particularly in Hudson and James Bays. The first call after leaving Montreal is made at Cartwright, on the Labrador Coast, followed by Port Burwell at the entrance to Hudson Strait, and the following points in the order named: Lake Harbour, Stupart Bay, Wolstenholme, Cape Smith, Port Harrison, Charlton Island, Churchill, Southampton Island, Dorset, Lake Harbour, Port Burwell, Dundas Harbour, Craig Harbour, Pond Inlet, Clyde River, Pangnirtung, Cartwright, and St. John's, Newfoundland. The usual call at Godhavn, Greenland, to exchange courtesies with the Danish officials there will be made on the return part of the patrol possibly after the call at Clyde River, Bathurst Island, Lake Harbour, Pangnirtung, and Pond Inlet are on Bathurst Island; Dundas Harbour is on Devon Island, and Craig Harbour is on Ellesmere Island. They are all Government posts and among the chief objects of the expedition is to re-provision these posts and to effect changes in the personnel.

Dr. Malte, the botanist with the expedition, will make the entire voyage. Dr. Gunning, geologist, will leave the ship at Cape Smith on the east coast of Hudson Bay and cover the area between there and Wolstenholme at the western entrance to Hudson Strait, rejoining the expedition when the boat makes its second call at the latter port. Dr. Fairbairn, parasitologist, will disembark at Chatter Island and carry on his studies in that area returning a ship by rail from Neosho.

### First Impression

Biggins, stated London was the first time, and on his return was asked by his friend Smith what struck him first about the Metropolis.

"The traffic," replied Biggins; "and my next impression was a cool hand on my brow, a smell of antiseptic, and a voice asking me if I felt better."

**Controlled Currency.**

From the Monthly Letter issued by the Royal Bank of Canada:

"The fundamental divergence of opinion between the gold countries and the countries which have abandoned the gold standard has had its counterpart within the borders of each individual country. Those who caricature the economist who wishes for a higher price level, as an ignoramus attempting to raise himself by pulling at his own bootstraps, are bitter-end gold enthusiasts who claim that it does not matter whether the farmer receives \$1.00 or 50c. for his wheat, provided that the price the farmer pays for goods is proportionately higher in the first instance than in the second.

"It may be well to consider the position of the farmer in particular, since what is true of the effect of price level on the farmer is also true of the manufacturer, the miner and the distributor. To that particular farmer whose annual interest payments and taxes amount to \$600 per year, it makes an immense difference whether his surplus, over direct operating costs and living expenses, amounts to \$800 or \$1,000. With a surplus of \$1,000 he will be able to pay his interest and make some reduction in the principal of his mortgage; with \$800 he finds himself deeper in debt at the end of the year than when he started his work. This same principle affects all who pay taxes or owe money on mortgages or bonds. Credit is a most important factor in modern economy, and credit means personal or corporate debt. When surplus over current expenses is sufficient to meet interest charges, there is every encouragement to make further efforts to improve the situation. When no possible means can make surplus meet debt charges, credit is destroyed, morale undermined, purchasing power reduced, business turnover restricted, unemployment increased, and hardship becomes general. For the government the situation becomes even more acute. At a time when revenue from taxes is falling to lower and lower levels there are extra charges for the relief of the unemployed. The higher price level brings greater revenue and reduces the call upon the government for unemployment relief. From this statement of the situation it is clear that the major benefits derived from a higher price level are those which affect the internal economy of the country. It is this point of view which made the major issue of the World Conference that of raising and stabilizing the general price level."

We have a fresh supply of scratch pads now ready. Especially useful for school, store or telephone. 2 for 5 cents - Pioneer Office.

**Culling the Laying Flock.**

With the general low price of poultry products now prevailing, it behooves the poultryman to keep his cost of production as low as possible. Present economic conditions call for the elimination of the undesirable and unprofitable hens from the farm flock, thereby increasing the quantity and improving the quality of eggs produced, and decreasing the cost of production by a saving of feed, housing and management wasted on the non-producing or low-producing hens.

It is important to be able to distinguish between the laying and the non-laying birds. If a bird is laying the comb will be red and full, the vent dilated and moist, the pelvic bones thin, pliable and wide apart, and the abdomen large, soft and pliable, while if not laying the comb will be pale or whitish-colored, the vent contracted and dry, the pelvic bones rigid and close together, and the abdomen firm or hard. In a yellow-skinned bird the beak, vent and shank of a heavy layer are pale yellow or white in color, whereas the beak, vent and shank of a poor layer or of a layer that is taking a long rest, are usually bright yellow in color.

The health and type of the layers are also important points to be taken into consideration in culling. Only those birds that are healthy, vigorous and that have a wide back of good length combined with a deep body, should be retained in the flock.

One other important feature that should be kept in mind in culling is to note the time of the molt. As a rule birds that molt before September 1st are poor layers, while those that molt later in the year are good layers. The latter part of August is, then, an excellent period for culling the laying flock and at that time all hens that have quit laying should be culled.

The above-mentioned factors are kept in mind when culling the laying flock at the Dominion experimental station, Lacombe. A close watch is always kept on the flock for any outstanding boarders, these being marked and disposed of in the late summer or early fall.

H. E. Wilson.

**Here and There**

Indications point to a fairly early harvest in Western Canada, says a late July weekly crop report of the Canadian Pacific Railway agricultural department. A few points in southern Manitoba, the report added, had already started cutting wheat and barley.

Canada jumped to fourth place in bacon exports to Great Britain last May as compared with sixth place in 1932, behind Denmark, Holland and Poland. Total exports to Great Britain from Canada in May were 5,566,400 lbs. or at the rate of 66,000,000 lbs. per annum.

There were increased retail sales in Canada in May as compared with April and the index number of the Dominion Bureau of Statistics rose from 83.7 to 85.6. Hardware had the best showing, the increase being from 75.8 to 112.3.

A spare blue-clad figure which to thousands of passengers through Vancouver in the past seven years represented a symbol of friendliness in a strange city will no more be seen around the wharves and terminals of the Canadian Pacific railway in the Coast city since Albert Charles Pearsall, terminal passenger agent for the company, died there recently.

With rising prices for wool and a vast Chinese market for wheat caused partly by advantageous monetary exchange, Australia is rising steadily to a greatly improved economic position, declared Warwick Fairfax, managing director of the Sydney Morning Herald, Australia's oldest newspaper, a traveller recently on the Canadian Australasian liner Niagara.

Meeting at a time when the nations of the world were never so much in need of close co-operation economically and politically, the fifth biennial conference of the Institute of Pacific Relations to be held at the Banff Springs Hotel, August 22-25, is regarded as a possible turning point in the affairs of all the nations bordering the Pacific.

Self-regulation of motion pictures by producers to conform with ordinary standards of decency will ultimately render boards of censors unnecessary, predicted Will H. Hays, Czar of Hollywood, interviewed recently at Vancouver where he arrived from a short stay at Banff and Lake Louise. Clark Gable was another movie star visitor at these famous mountain resorts.

All Ontario district brother officers of Norman M. McMillan, superintendent, Bruce Division, Canadian Pacific Railway, with H. C. Groat, general superintendent, as chairman, took part recently in a presentation to Mr. McMillan of a silver tea and coffee service, at the Royal York Hotel, Toronto, on the occasion of his promotion as assistant to H. J. Humphrey, general manager, eastern lines of the railway.

**Big Fish—Happy Fisherman**

I took a 35 pound musky for myself like this one and then sympathize with J. A. Gibson of Toronto who fought for four and a half hours near French River, Hunslow Camp 215 miles north of Toronto, to land it. It is the seventh musky to be caught near the camp by guests this season and was caught on Friday, July 21st, so fisherman's luck seems to be a complication of equanim. The scene took place late in the afternoon right in front of the outlying camp dock in full view of guests who lined the shore and started fires in order to see the finish, forgetting dinner and later celebrating the latest entry in the bungalow camp annual musky competition fittingly. Since every musky to date has practically been larger than the last, the winner of the challenge shield this year may become famous... if he can land it.

Regular Inspection Without Obligation

WORLD HAPPENINGS  
BRIEFLY TOLD

The four-power European peace pact has been signed here by Premier Mussolini, and representatives of France, Germany and Great Britain.

Sixty Jersey cattle, including three bulls, valued at more than \$10,000, left Jersey on their way to their new owners in Canada and the United States.

Drought in parts of Southwest Africa is now in its eighth year, and many farmers have been ruined while others are trekking over the country with their cattle in search of grass.

During the four weeks ended June 18, Canadian grain exports through New York totalled 2,425,000 bushels, a decline of 2,027,000 bushels from a year ago.

With several thousand men on the waiting list desirous of entering the Royal Canadian Mounted Police, the list has been practically closed for the time being.

Edmonton has the most air-minded city in Canada, according to Col. George A. Drew, of Toronto. Addressing the Empire Club at Winnipeg, Col. Drew said Fort McMurray, north of Edmonton, was the greatest aviation centre in Canada.

There was a very definite pickup in the exports of Canadian agricultural products to the United States in June, the value of the total being \$546,000 compared with \$217,000 in June, 1932, a report of the Dominion Bureau of Statistics said.

The "Royal Scot," crack British railway train now on show at the Chicago Exhibition, will likely visit Winnipeg this fall after the close of the Chicago Fair, according to a letter received by Mayor Ralph Webb from the Montreal representatives of the London, Midland and Scottish Co.

With an Anglo-Russian economic warfare ended as a result of negotiations between Max in Litzmann, Soviet Foreign Commissioner, and S. John Simon, Secretary for Foreign Affairs, Great Britain is looking forward to a greatly increased export trade with the Soviet Union, officials said.

## Parasitological Research

McGill University To Investigate Parasitic Diseases Of Domestic Animals

Last year's report of the Empire Marketing Board referred to a decision of the board to share with the National Research Council of Canada the cost of maintaining an Institute of Helminthology, study of man and intestinal worms, at Macdonald College, McGill University, Montreal, for the investigation of parasitic diseases of domestic animals.

The laboratory buildings have been completed and equipped during the year with funds provided by the Quebec Government, Dr. T. W. M. Cameron, formerly of Edinburgh University, has been appointed director of the institute and work started on April 1, 1932. The establishment of the institute has been welcomed by agricultural and lay opinion in Canada. The administration of the work is under the control of a specially appointed associate committee on Parasitology of the "National Research Council, of which Dr. H. M. Terry president of the council, is chairman.

## Prince Buys Sixth Plane

Newest Machine Has Armchair Seats For Passengers

The Prince of Wales has purchased another aeroplane his sixth. The new machine is a De Havilland Dragon, with a maximum speed of about 150 m.p.h.

It is a biplane with six armchair seats for passengers in the cabin, and separate accommodation for the pilot in the cockpit. The arm chairs are upholstered in scarlet leather and the cabin is decorated in fawn and red. The plane is two-engined with 260 h.p. It is finished, like all the prince's planes, in the red and blue of the House of Windsor Flying Club.

Flight-lieutenant F. H. Fielden, the prince's personal pilot, took the machine across the channel on a test flight. The prince intends using it himself.

By Ruth Rogers

529

FOR MATRONS OR YOUNGER WOMEN WHO FEEL THEY CAN SUPPORT SLIMMING LINES

Here's a snappy Paris model you can make at just the cost of the material.

It is a dress you can wear and wear and always look smart.

It is a black and white conservative checked soft crinkly crepe silk.

It depends entirely on its lines for its smartness. It needs no further adornment.

It has the slimming wrapped bodice and interesting curved hip seaming to lengthen the silhouette. The sleeves not too full, puff just above the wrists which gives a certain grace to the hands.

Printed of plain crepe silks are equally smart to fashion it.

Style No. 529 is designed in sizes 16, 18, 20 years, 36, 38, 40, 42, 44 and 46 inches bust. Size 36 requires 4 yards of 39-inch material.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

## Shined Thousands Of Shoes

Colored Man Has Been Railway Porter Forty-Six Years

In forty-six years of service as a porter at the union station of the Maine Central and the Boston and Maine railroads, in Portland, Me., Green, colored, figures he has put a bright gloss on approximately 671,000 shoes, and grinned for 335,000 customers.

What's more, he figures that about \$1,569,500 worth of shoe leather has gone under his polishing cloth. He is known to travellers from all over the world who come to Maine for their vacations.

## Bad Times Man-Made

Dr. Beaumont, English poet, wrote in the seventeenth century "If we would rightly see, it's not the times are bad, but man." The comment is still correct. Men are mostly man-made.

There is an occasional catastrophe brought by the forces of nature. But natural disasters do not measure in effect with man's economic social, political blunders. We are tripped by our own stupidity. Prudence Sun.

## Powerful Flashlight FREE for POKER HANDS!

ONLY Four complete sets of poker hands will secure you this handy flashlight (complete with batteries). Useful in the car or in the house and but one of the many valuable gifts given in exchange for Turret Poker Hands.

Sun ripened mellowness... extra satisfying flavour. That's the quality you want in cigarette tobacco and that's the quality you get in every package of Turret Fine Cut. And there's genuine economy too. You can roll at least 50 cigarettes from a 20¢ package.

## Recipes For This Week

(By Betty Barclay)

## CHEESE SOUFFLE

- 3 tablespoons quick-cooking tapioca
- 1 cup milk, scalded
- 1 cup grated cheese
- 3 egg yolks, beaten until thick and lemon-colored
- 3 egg whites, stiffly beaten with 1 teaspoon salt

Add tapioca to milk, and cook in double boiler 15 minutes, or until tapioca is clear, stirring frequently. Add cheese and stir until melted.

Add egg yolks and mix well. Fold in egg whites. Bake in greased baking dish, placed in pan of hot water. In moderate oven (350 degrees Fahrenheit). Souffle is done when it shrinks a trifle and is brown. Serves 4.

When made with quick-cooking tapioca and properly baked, souffles do not fall, but stay tender, moist, and light while being served.

## RASPBERRY ICEBOX PIE

- 1 cup small vanilla wafers, rolled fine
- 1 package raspberry gelatin dessert
- 1 pint raspberries
- 1/2 cup cream, whipped, sweetened and flavored

Roll wafers fine and line buttered pie plate with the crumbs. Prepare gelatin according to directions on package. Chill and when beginning to set, pour into crumb lined plate and chill. When set add 1/2 cup of fresh raspberries and cover with whipped cream. 6 portions.

## Old Document Found

Letter Written In 1876 Offered Judgeship To Nova Scotia

A letter in which Canada's second premier, Alexander Mackenzie, offered a judgeship to Senator William Miller of Achnacraig, N.S., in 1876, has been found and presented to the provincial archives.

Written in the premier's hand-writing, the letter reads:

"My Dear Sir: We expect within a few days to make the several appointments to the county court in Nova Scotia as the local government desires to issue the proclamation provided for by the statute. I write to request you to allow me to submit your name to my excellency for the Cape Breton district. "Mr. Blake left for England three weeks ago, or he would have communicated with you on the subject. I know, however, that your nomination will be entirely satisfactory to him, and I have every reason to believe that it will give general satisfaction in the district and in the province.

"I will feel greatly obliged by receiving your early answer, and remain, My Dear Sir, Yours Faithfully, A. Mackenzie."

It's as simple as this. The nations must come to peace or go to pieces.

## Never Fully Explained

Learned Men Do Not Know How Memory Functions

Memory is both a physiological and a psychological process, and has never been fully explained. It is all very well for learned men to tell us that impressions are made upon certain nerve-cells in the sensorium, and that these nerve cells have both sensibility and retentive power, and are capable of prolonging the vibratory excitations which first set them in motion. The sensorium, by the by, is that common reservoir into which all the impressions that have thrown the nerve fibres into agitation flow and subside. This has not solved the problem of why we remember some things and forget others, or why some men have memories called "good" and certain other men have memories called "bad."

If it were not for memory we should wake up every morning as helpless as a new-born infant. It is memory that teaches us to look at the clock by the bedside to see what time it is; memory teaches us how to put our clothes on; and instructs us that bacon and eggs are good to eat and that the knife and fork by the side of the plate are the implements for dealing with our food. Our speech and every trivial action of our lives depend entirely upon our memories.

Which reminds us that it is possible to forget the name of a thing, but not its use. A patient suffering from a disorder of the brain could not remember what a spoon was called, but knew quite well that it could be used to eat soup with.

One suffers from this complaint and calls things by wrong and most inappropriate names, while others can describe an object without being able to recall its name. Thus, a pen would be indicated as "the thing you use for writing." This particular defect of memory is called amnesia.

## Russia Spoiled Plans

Of Finnish Aviator

Flier Was Not Allowed To Go To East Coast

Bronzed by sun and wind after 16,000 miles of flying which would have taken him more than half way around the world if it had not been for international complications, Captain Waino Brenner, young Finnish aviator, brought his monoplane to rest at the Ottawa air station. His Atlantic flight was cancelled.

Captain Brenner left Finland on May 1, intending to fly his small aluminium plane, which took him to Cape Town and back last year, around the world. After successfully navigating the route over Germany, Arabia, Persia, India and China, he finally arrived at Yokohama. From there he intended to fly to Vladivostok in Siberia, and so on to Tokyo, Alaska. However, Russian officials refused to allow him to fly up the east coast so he was forced to ship his plane to San Francisco from where he flew to Ottawa.

It is estimated that there are nearly 125,000 kinds of flowering plants.

## Canadian Landscapes

Exhibition Of Water Colors Shown In England

London's gallery-goers are showing keen interest in an exhibition of water colors, many of Canadian scenes, being shown at the Graham Gallery in new Bond Street by Miss Elizabeth Harper, of the Overseas League. Queen Mary is among those who have attended the show.

"Miss Harper," great admirer of Canadian landscape, has painted scenes as far north as Hudson Bay and includes in the present exhibition pictures done at Windsor, N.S., Ottawa, the Rockies and as far west as Vancouver. Among her subjects are: "Mount Edith Cavell," "Mount Robson," "Great Trees, Stanley Park," "A Sunrise on Hudson Bay," "Moose Factory," and "Scenes on the Moose River in Northern Ontario." "The Lions' Yachting," "Crease, Mountain," "Lake Louise and Emerald Lake."

Capture in her strong water colors of Canada's brilliant atmosphere as well as the country's more sober moods occasioned much favorable comment. Her show contains also pictures painted in New York and in the West Indies.

## An African Superstition

Natives Believe Babies Should Be Smoked Over Fire

One of the most peculiar tribal customs among natives of darkest Africa, is the superstition that a baby must be held over the smoke of a camp fire in order to make it "pure" and such a baby must not associate with one which was not "smoked" as an infant.

Such was the report of Miss Ruth Cowles, R.N., at Johannesburg, South Africa, a nurse of the American Board of Commissioners for Foreign Missions. She is a native of New Britain, Conn., and her parents live in Alhambra, California.

But we are gradually proving," Miss Cowles wrote, "that such superstitions are groundless, and that tots, smoked or unsmoked, are safe in the hands of our native Christian nurses."

## Heavy Tourist Travel

Indications That Visitors To National Park Will Equal Peak Year Of 1929

Tourist travel in Canada's national parks this season has given indications of equalling in volume the peak year of 1929, according to information reaching Hon. T. G. Murphy, Minister of the Interior. The first day of July marked the opening of the season in most national parks, particularly in the Rocky Mountain region, and the number of visitors over the Dominion Day holiday is usually taken as an indication of what the season will produce.

At Banff national park in Alberta, all available accommodations were reported on Dominion Day and many tourists slept in their cars if they reported.

# ONLY FIRESTONE gives you all these EXTRA VALUES

**T**wenty-five to Forty per cent, longer tire life at no extra cost . . . that's the bonus you get for buying Firestone Tires.

Firestones do not cost one cent more than ordinary tires, but only in Firestone tires can you get a combination of Gum-Dipped Cords, 2 Extra Cord Plies under the tread, Balanced Construction and a scientifically designed Non-skid tread which make for extra strength . . . extra safety and extra mileage.

Gum-Dipped Cords with every fibre of every cord coated and covered with rubber have 55% longer tire life.

2 Extra Cord Plies under the tread gives 20% extra protection against blowouts, and makes Firestone tires safe in any road.

The Firestone tread is wider, deeper and accented to give you more traction and safety.

inferred to rejoice that any circumstances of fate had placed her in the same art class with the young Norseman, whom Professor Drake addressed as Mr. Anson, and whom she ascertained by subtle questioning among the students, was named Peter. Simple, straightforward name—Peter Anson. It suited so admirably his splendid physique and his frank, amiable manner. Camilla sighed and dropped her charcoal pencil on the drawing board with a gesture of resignation. Her sketch already resembled a man's head more than a Grecian urn.

"Having difficulty, Miss Hoyt?" Professor Drake's booming voice recalled her to still-life consciousness and, what was worse, drew to her the attention of the whole class, including Peter Anson.

Camilla coloured painfully and confessed: "I—I don't know—just what is the trouble. My sketch isn't going very well."

"Ahem! I see no reason for that, Miss Hoyt. You have mastered far more difficult studies. This one is very simple—ah, here is a splendid piece of work," taking up Peter Anson's sketch as he passed on his way toward Camilla, and holding it up for the inspection of the class. "You see, the proportions are perfect—in fact, it is a replica of the original, Mr. Anson." He turned suddenly, "will you look at Miss Hoyt's sketch and see if you can find her trouble. You want experience as a critic, so tell us what should be done about it."

Peter and Camilla exchanged appealing glances that escaped the instructor's professionally keen eyes. Peter hesitated. "But I'd much rather not criticize the work of fellow students, sir—"

Camilla thought she detected an amused flicker at the corners of his mouth that leaped up and sparkled in his eyes, but his expression betrayed nothing to the waiting class.

Everyone recognized that Peter Anson was the outstanding genius of the National Art School and a favorite protégé of Professor Drake. But no one resented Peter's superiority, because everyone liked Peter; whether they knew him well or not. He never was condescending or supercilious, rather the contrary; and out of class he scorned any claim of superiority. His shy reticence even added to his charming manner a certain diffidence that appealed to everyone.

After a moment's sober inspection of Camilla's sketch and several corroborative glances toward the still-life study, he remarked, "I think Miss Hoyt that you were not seeing the study-object when you made this—there is so little resemblance. And yet it suggests something very—shall I say—real—more alive? If you will notice, the handles of the urn in your sketch look more like—cars, perhaps. You must have been sketching some other object from memory, unconsciously." He turned to Professor Drake. "Sorry, sir, but I don't think I can offer a fair criticism of this, under the circumstances."

"Very well, Mr. Anson. I would suggest, Miss Hoyt, that you follow the study object more closely, hereafter. When we have occasion to work from imagination you may do so."

"Yes, sir," agreed Camilla, collecting her materials and looking neither to her right nor left. Scorn for Professor Drake and Peter Anson burned and seethed within her breast. She felt like a troubled volcano ready to erupt with anger and humiliation that

A Hand Touched Her Shoulder

"And how?" demanded Professor Drake, "do you expect to criticize the work of professionals if you do not begin on students'?" Perhaps, he suggested, "your criticism would be of greater value to Miss Hoyt, even than mine would be."

Peter smiled placidly and stepped back to Camilla's chair. "In that case," he said, "I'll be glad to offer suggestions." And his smile was transferred to Camilla as his blue eyes met her staring black ones. Like sunshine scintillating on blue ice, she thought, reaching her sketch pad toward him at arm's length before he had a chance to come closer.

She wanted to escape from the room, to hide her burning face; but her fascinated gaze was held by his as he inspected her work.

### HELP FOR TIRED WIVES

Take Lydia E. Pinkham's Vegetable Compound

Wives get tired from these hard tasks that demand so much of the husband of the family. When the husband comes home with less energy than he goes out with, it is the wife who must struggle along and make the best of things.

If you are tired, worn out, nervous, try Lydia E. Pinkham's Vegetable Compound. It will give you the strength to carry on.

98 out of every 100 women who report so say that they are benefited by this medicine. Buy a bottle from your druggist today . . . and watch the results.

would manifest itself in scathing words and violent tears, if she did not escape soon from the room.

Which she did, the moment the scene was dissipated, hurrying, almost running out of the building into the spring sunshine. The art school building boasted a classic setting along a magnificent parkway that followed on toward the art museum, a formal garden and a lagoon that mirrored like a Georgian mirror, splashing fountains and verdant foliage.

The park benches already had been put out by the custodian, testifying to the season with their new green paint. Camilla slipped through the line hedge and sank down upon one of them with her head pillowed on her arm, angry across the back of it. Silent, angry sobs shook her shoulders. Turbulent thoughts seethed in her mind. Life was a wretched thing. It pushed you into some queer circumstances like a foaming whirlpool, and then challenged you to struggle out of it, jerking at you from the shore and pushing you back into the torrent again when you managed to gain a secure hold that promised safety and serenity.

Ever since she had discovered, three long, long ago, that life was a mad whirlpool, she had made a valiant effort to conquer it. And

just when she grasped a rock of hope and was feeling its solid security, she had slipped back into the eddying chaos again. Meeting Peter Anson had done that to her. And today's experience was like a violent shove of a hand that pushed her below the surface and left her groping hopelessly.

A more prosaic person might scoff at Camilla's mental simile, and call it hyperbole and fantasy. But, of course, Camilla was not prosaic. Her aesthetic mind matched her astonishing beauty. She was dramatic and vivid, and imaginative, as she was complete in her facial requirements and describes Camilla in the abstract.

As for visible features: the sparkling depths of her brown eyes first attracted you, then the childish curve of her red lips; her nose was an inconsequential thing that served to complete her facial requirements and her skin was like ivory satin that tempts the caress of your finger to see if it is soft as it looks. This picture was framed in a cloud of shining hair, black as ebony, and you could not soon forget the sweet, lingering way the black curls cling to the curve of her neck.

These are merely suggestions of the glowing beauty of Camilla. But the Greeks had a superstition that the gods were jealous of a man—or woman—who had too much good fortune, so they pulled him down. As Solon neatly put it to Croesus, "Count not man happy until he is dead, you never can tell what might happen to him."

So the gods had conspired to complicate affairs for Camilla, who was almost too beautiful in their covetous eyes. But Camilla was not weeping at the Acropolis in ancient Greece. She was crying on the art school campus in twentieth century America, and held no superstitious respect for Greek gods or any others unless it was a fair-haired youth who might have personified a god in Norse myths, so much like a Thor or a Balder did he look. But she resolved now that even if she had the opportunity, she never would speak to him. He was as vain and conceited as he was handsome. So ran her distorted thoughts that were a mixture of resentment, humiliation, and love.

A hand touched her shoulder, lightly, then rested more heavily with gentle entreaty. Chills of panic quivered through Camilla's tense body.

(To Be Continued.)

Made Poor Choices  
Garbade Meghrial, a Syrian, found a dandy place to stay away from the "Le de France" when she sailed from Havre. It was a ventilator. Three days at sea, however, and Meghrial discovered why it was called a ventilator. It ventilated. He caught cold, sneezed, and was thrown into rags.

## Occasional Wife

### CHAPTER I.

Camilla gave her smocked shoulders a little shake of determination and hunched them over her sketch pad, focusing her eyes intently upon the still-life model which the art instructor had selected for the next progressive step of his class toward artistic appreciation and creative expression. With detailed precision, he had called their attention to the perspectives, receding contours, highlights and symmetry of the Grecian art. A still-life study, he had called it.

To Camilla, the word had implied vaguely some horrible tragedy. At any rate, no two such antithetic words had any right to be hyphenated she thought. She preferred studies in active life, anyway. Virile, robust, glowingly alive, like well, like the study of real life which interferred too much with her line of vision toward the still-life study object that she was sketching with impatient difficulty.

## BASEBALL.

DIDSBURY vs. HAINSTOCK.

With Charlie Cook leading the assault with a homerun and two singles, Didsbury ball tossers battered four Hainstock twirlers all over the lot and won another easy game 13-0 Friday night. Every man on the team hit safely. Bob Gooder and Howard Evans getting two baggers, while Geo. Hardy and Jim Devolin turned in fine pitching performances. Hardy started the game, allowing two singles and making seven batters whiff the air. Devolin gave one hit and fanned one. A double-play, Wyman-Cook-Wyman, completed a perfect day for the locals.

Gardin in right field was the star for Hainstock. A fine one-handed catch off Wyman's long fly in the 1st inning was the feature. Hainstock either didn't have their regular team or else had a decidedly off-day, as 7 errors gave Didsbury 4 unearned runs.

Didsbury: Wyman 1b, Cook 2b, Gooder ss, E. Evans rf, Woodlock c, H. Evans 3b, Devolin cf and p, Hardy p and cf, Stauffer lf.

Hainstock: C. Ross lf, D. Ross 2b, Cripps p, Ulyess, Black c, Gardin rf, Foster cf, Grant 1b, E. Ross 3b.

### Mountain View Notes

The monthly meeting of the W.L. takes place at Community Hall on Thursday.

Cutting will commence this week, as many crops are ripening quickly, and it looks as if the menfolk are going to be rushed.

Mr. and Mrs. Ed. Barnes and Mr. and Mrs. Mr. and Mrs. Ellis Barnes were recent visitors at Sylvan Lake.

Mr. and Mrs. B. A. Atkinson and Mr. Eric Atkinson spent Sunday at the home of Mr. and Mrs. Paul Thomas at Betchton.

Many from this community were in attendance at the memorial service on the Butte on Sunday afternoon commemorating the noble sacrifice made by local men in the Great War.

Among those who attended the lecture and dinner given by Mr. Henner at the home of Mrs. Ed. Barnes were Mr. and Mrs. G. Tighe, Mr. and Mrs. H. Roberts, Mr. and Mrs. Smith, Mr. and Mrs. Ed. Ford, and Mr. and Mrs. B. A. Atkinson. The demonstration of Super-Health Mammogram was enjoyed by all. The men greatly enjoyed hearing about the evils of tobacco and we may witness many of them engaging in a more profitable pastime.

### RUGBY NOTES

Mr. and Mrs. A. C. Wahl entertained at a shower in honor of Mr. and Mrs. Harvey Hoesgood on Friday evening last. Over forty guests were present to spend an enjoyable time in games and a short program. During the evening Mr. J. McDougall very fittingly expressed to the honored couple the good wishes and happiness desired for them, following which the little Misses Cunningham brought in a large basket filled with parcels. The many gifts were both beautiful and practical. The recipients, in well chosen words, expressed their thanks. A delicious supper served by the hostess completed a very delightful evening.

### Burnside Notes.

Mr. and Mrs. N. Eckel spent the weekend in Calgary.

Mr. Caspar Sanford has been confined to his home with a lame back for a few days.

Mrs. Clarence Weal and son Teddy of Calgary, are spending their vacation with the former's parents, Mr. and Mrs. A. E. Thompson.

Mr. and Mrs. John Topley spent the weekend in Edmonton, motoring back with their daughter Elsie, who is training at the Royal Alexandra Hospital.

### WEEKLY JOKE

Teacher: "Correct this sentence. It was me that split the ink."  
Pupil: "It wasn't me that split the ink."

## LOCAL & GENERAL

Miss Laura Smith is spending her holidays at Ponoka and other points.

Mr. A. L. Melnes spent the weekend in Calgary, returning on Monday.

Mr. H. W. Chambers leaves on Friday for Vancouver, where he will spend a couple of weeks on vacation.

Mrs. Jones, of Leduc is visiting her father, Mr. Wm. Wilson at Spruce Lawn Farm.

Miss Helen Tempany, of the Royal Bank staff, left for Cochrane on Tuesday for her vacation.

Mr. and Mrs. Frank A. Farrow, of Calgary, were the dinner guests of Mr. and Mrs. Erren Rodney on Sunday.

Mr. and Mrs. A. L. Brown, of Edmonton and Mrs. L. E. Speelman, of Trochu, visited at the Spelman home this week.

Mr. and Mrs. W. G. Liesemer and daughter Evelyn leave today for Chicago, where they will visit their son and also take in the World's Fair.

The subject of the sermon at Zion Evangelical Church next Sunday morning will be "The Body of Christ" and in the evening, "Seeking and Finding."

Mr. Geo. McKenzie-Griaves who has been spending his holidays with his parents at Vancouver, returned to his desk at the Royal Bank on Tuesday.

A large number of people in the district have expressed their intention of taking advantage of the cent-a-mile excursion rate to Vancouver and Victoria. These cheap fares offer great opportunity to have a real vacation at minimum cost.
